

WOODPECKER
NATURALLY INSPIRED FLOORING

2022 | 2023

THE
LINE

the line
the descendants of a common ancestor,
a row of trees,
a cord used in measuring or leveling,
a long, thin mark made by a pencil, pen or chalk,
a similar mark cut in a hard surface,
a crease in the palm,
a plan of; making or doing,
an assembly of merchandise,
a course of conduct, action, explanation,
a person's trade or occupation,
a furrowed brow,
a stock of goods of a particular type,
the field of one's special knowledge,
a short letter or note,
a row of persons waiting in turn.

Follow the line from us to you.

From generations past,
for generations to come
- we are Woodpecker.

From our family to yours... for 100 years.

THE WOODPECKER STORY

FOR 100 YEARS
GONE BY, AND FOR
100 YEARS TO COME

The Woodpecker story began in 1973 in a small garage in Bristol. Started by Bruce Ker, the passion for wood and commitment to deliver the absolute best has been handed down through 3 generations to his son Nelson, and grandson Darwyn today.

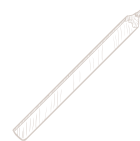

From humble beginnings...

FROM OUR FAMILY TO YOURS

Today our extended family of 'Woodpeckers' are committed to those same values, genuinely caring and doing whatever it takes to make the difference for you and your family.

YOU CAN WATCH THE
WOODPECKER STORY VIDEO HERE:

woodpeckerflooring.com/the-woodpecker-story

THE STORY OF OUR FLOORS

It begins long before this. Every Woodpecker floor started its life over 100 years ago, and tells its own story that will stand the test of time in your home.

FOR 100 YEARS

Our promise to you is that your Woodpecker floor will continue its story, bringing life and warmth to your home – guaranteed for 100 years to come.

LEAVING A LEGACY...

Planting the Woodpecker forest of tomorrow and becoming carbon negative by 2030 – this is our commitment to building a better future that generations to come will be proud of.

From 100 years past and for 100 years to come, Woodpecker is with you every step of the way on your journey to find the perfect floor.

...from our family
to yours for 100 years.

100 YEAR WARRANTY
WOODPECKER

WOODPECKER PROMISE

Peace of mind
for generations to come.

We are proud to bring you our unique
Woodpecker 100 year warranty.

Our passion for and knowledge of wood means
we are confident that our wooden floors
endure more than a lifetime, increasing in depth
and character over time as their story becomes
a part of your home.

Carefully grown, selected and crafted by
experts, every plank is a reflection of our
commitment to you and your home.

Our promise to you – beautiful floors and
peace of mind, for 100 years.

Please note that our Stratex® floors continue
to offer a market leading 25 year warranty

WOODPECKER PROMISE

SERIOUS ABOUT SUSTAINABILITY

Leaving a legacy,
for generations to come.

As a company with a rich past and benefiting every day from the commitments our ancestors made, nothing is more important to us than the legacy we leave for future generations.

Of course, all our wood is sourced from responsibly managed, sustainable forests and is fully certified to the highest standards. We also offer elegant bamboo floors, the most sustainable choice which grows even faster after cutting and regenerates every 5 years!

But that's not enough for us. We strive to improve and do our best every day, and so have committed to Woodpecker being the first carbon negative flooring company by 2030.

That commitment starts today - we are creating the Woodpecker forest of tomorrow, planting 50,000 oak saplings over 200 acres in the beautiful countryside around our home in South Wales, to ensure future generations continue to be inspired by the beauty of nature, past, present and future.

We are the ancestors of tomorrow; our legacy matters.

ENHANCING THE WOOD

FINISHES & GRADING

From neatly beveled to handscraped, and from smoothly urethane to sawn, we have the finish that will work perfectly in your home.

Clean

Character

SQUARE

A clean overall finish.

BEVELED

A traditional and ordered feel.

DISTRESSED

A charming timeworn appeal.

HANDSCRAPED

An aged look, smooth to the touch.

This clean finish suits modern décor very well and can help a room to feel bigger than it is.

The depth of the slight groove between planks will depend on the type and grade of wood you choose.

Each plank is hand distressed on its edges to produce small grooves and undulations that are reminiscent of a naturally aged floor.

The irregular ridges and grooves that result add depth and definition to the wood's surface, creating an aged look that's distinctive by eye yet smooth to touch.

A NOTE ABOUT THESE SYMBOLS

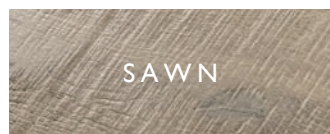

Some of our floors are available in more than one finish. To help you identify the right one for you we've added these symbols to the product codes.

⊙ = Oiled finish

Ⓢ = Urethane finish

Ⓢ = Part of our 'Signature' range

Sawn finish celebrates texture

Kerfs from the saw marks are left on the boards to see and feel, as though the wood has been freshly cut in front of you.

Natural and authentic

Unfinished boards are supplied with knots pre-filled and are pre-sanded ready for final filling and finishing as you wish.

Lightly brushed to reveal the harder grain

The finish subtly highlights the wood's texture both to the eye and to the touch.

Oil brings wood to life

Each board is coated between five and seven times, and cured with a UV lamp between coats to produce a protective, muted appearance.

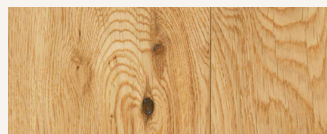

For the look of an oiled finish without the upkeep

With a dull satin sheen, the surface is smooth and hardwearing, as is true to a urethane, but has the appearance of an oiled floor.

Extremely smooth and glossy

Five to seven coats of urethane go onto each board, which is UV cured at each stage of the process.

SELECT

This grade looks natural yet consistent, with few knots. Up to 10% sapwood can be found in select boards along with considerable grain and color variation, but only small knots.

CHARACTER

A little more rustic shines through in character floors- including large knots, dark streaks, filled knots and color variation. Again, up to 10% sapwood is likely in this grain.

EXTRA CHARACTER

Very little is graded out in the extra character category. Large knots, splits, cracks and any amount of sapwood make this a particularly rustic choice, meaning that your floor will be all that more distinctive.

TIMELESS QUALITY

SOLID WOOD FLOORING

For a naturally beautiful floor
that will last a lifetime.

Nothing beats solid wood for a timeless natural texture and a robust feel beneath your feet. For a solid, traditional structure, each board is precision milled from a single piece of lumber that has been carefully chosen and graded then machined with tongue and groove on all edges, to ensure a perfect fit when installed.

Our solid wood boards are carefully selected and harvested from responsibly managed forests in Europe and the Americas. From a traditional character oiled finish to a striking hand-scraped statement board, our solid wood range offers choices to complement both contemporary and traditional interior design.

The mark of
responsible forestry

All of our wood floors
are responsibly sourced
with FSC® certification.

CHEPSTOW | BRUSHED AND OILED

PEACE OF MIND FOR
GENERATIONS TO COME

SELECTING THE BEST

The wood's natural texture is enhanced through a range of different finishes, each of which brings out a beautiful element of its character – distinctive grain patterns, mellow hues and rustic textures.

SOLID AND TRADITIONAL

Solid oak flooring is strong and durable with wonderful character. Classic knots and swirling grain patterns create a traditional look with beautiful texture. As oak ages, it also becomes richer and deeper in color, making a floor that seems to live and mature with you.

YORK | RUSTIC OAK

CHARACTER | OILED | URETHANE

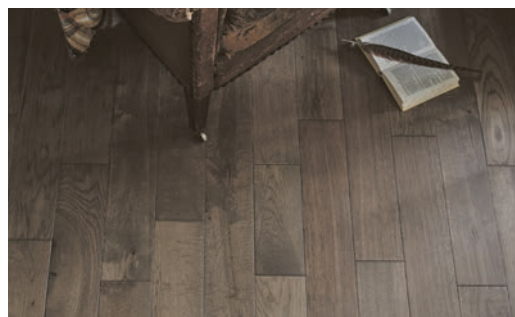

© 36-YRO-150 | 6 x 11 3/4-63in* | 21.31ft²/pack

Ⓛ 36-YOR-150 | 6 x 11 3/4-63in* | 21.31ft²/pack

A traditional floor with rich honey hues and a medley of plank lengths laden with elegant knots, dark streaks and filled cracks to create a wonderfully classic feel. And the boards' natural details are enhanced by five coats of natural oil or subtle urethane for a choice of beautiful finishes.

YORK | TAWNY OAK

CHARACTER | BRUSHED & MATTE URETHANE

36-YTO-150 | 6 x 11 3/4-63in* | 21.31ft²/pack

Presenting subtle brushed-out grain textures accentuated with rich burnt coffee tones, this elegant floor enhances the natural light and beauty of any room setting. The variety of plank lengths adds interest to this traditional yet surprisingly contemporary solid wood floor.

THE BEAUTY OF REAL WOOD

ENGINEERED WOOD FLOORING

For added versatility and practicality

With a substantial real wood top layer, Woodpecker engineered wood flooring combines the beautiful character and style of a solid lumber floor with the exceptional performance of our engineered board construction.

The central core of cross-layered softwood or plywood adds stability and is underpinned by a veneer layer for balance. This advanced construction minimises expansion, contraction and warping, and makes these beautiful boards suitable for modern day living and underfloor heating.*

Offering you the classic good looks of solid wood as well as outstanding versatility, engineered wood flooring is a perfect and practical solution for today's homes.

* Please note that Berkeley Century Pine is not suitable for underfloor heating.

The mark of
responsible forestry

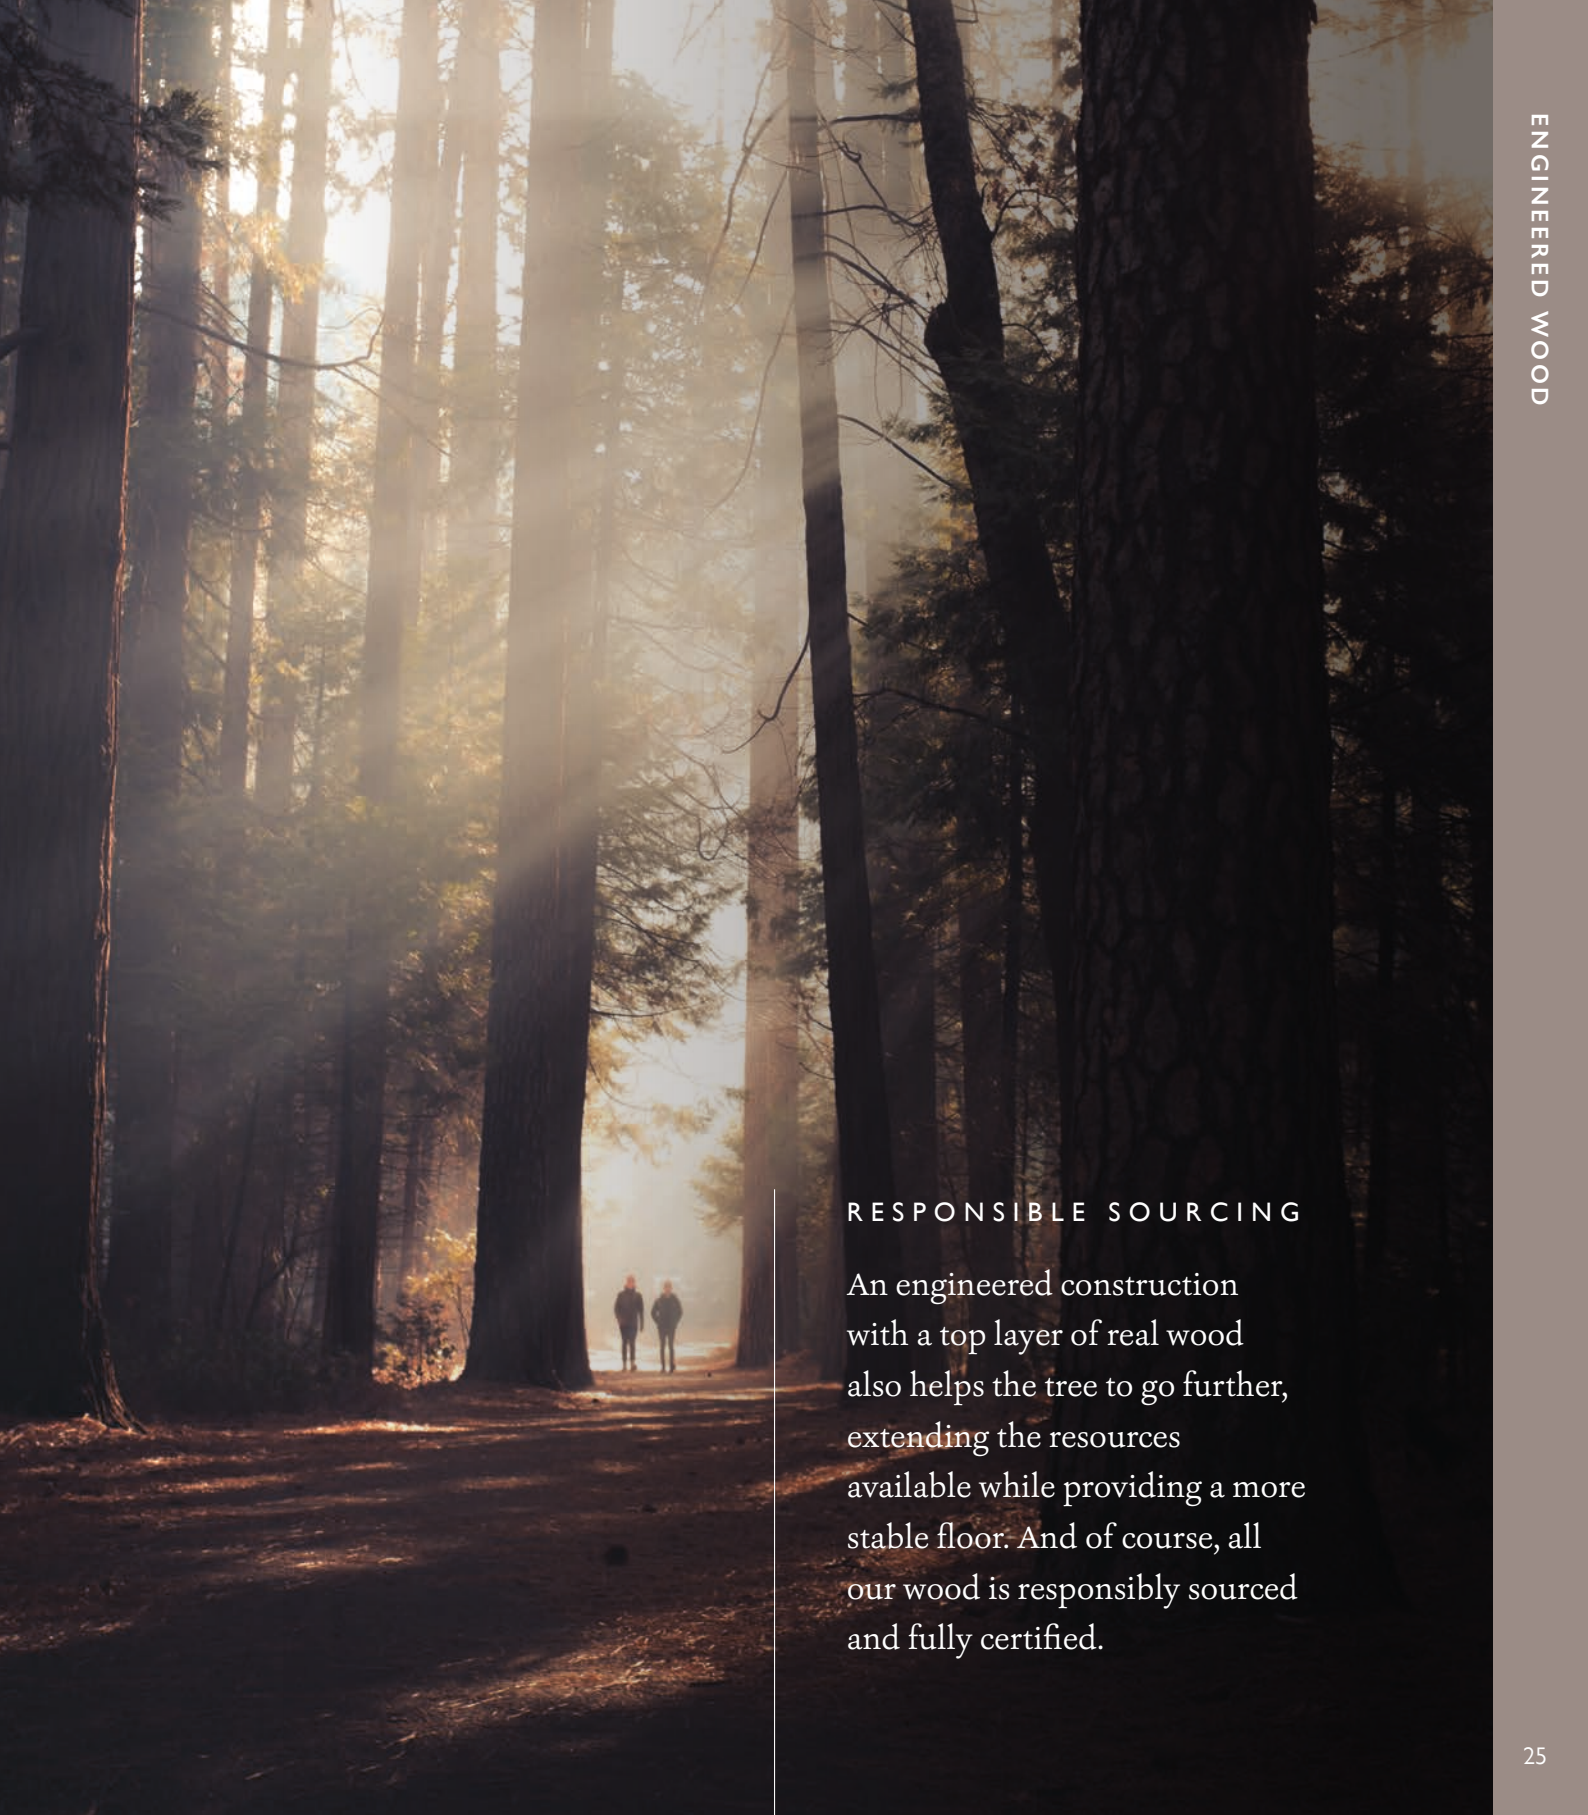

All of our wood floors
are responsibly sourced
with FSC® certification.

BERKELEY | CATHEDRAL OAK

PEACE OF MIND FOR
GENERATIONS TO COME

RESPONSIBLE SOURCING

An engineered construction with a top layer of real wood also helps the tree to go further, extending the resources available while providing a more stable floor. And of course, all our wood is responsibly sourced and fully certified.

ENGINEERED WOOD FLOORING

SALCOMBE

MUTED NATURAL HUES

A wide range of subtle shades
bringing the light and vitality of
the seashore into your home

SALCOMBE | NATURAL OAK

SMOKED FOR INTENSITY

Most of our Salcombe floors are specially treated using an age-old process called “smoking” which allows our experts to subtly enhance or intensify their beautiful tones by awakening the natural tannins in the wood. Offering more complexity than a simple stained board, these smoked colors add a new dimension to your floor.

Stylish Herringbone

GOODRICH | COTTON OAK

CHARACTER | BRUSHED & MATTE URETHANE

32-GCT-001 | 3 1/2 x 15 3/4in | 13.95ft²/pack

The lightest of parquets, this floor adds a fresh, clean and elegant feel to a space. With a whitewashed finish and full of natural detail, each board is brushed to bring out the beauty of the grain and finished with a matte urethane for a subtle sheen.

GOODRICH | WHITENED OAK

CHARACTER | BRUSHED & MATTE URETHANE

32-GWH-001 | 3 1/2 x 15 3/4in | 13.95ft²/pack

Light in color with a contemporary blend of ashen and flaxen tones, these boards marry striking rustic character with varying natural hues. A classic herringbone design enhanced by brushing and a matte urethane finish.

GOODRICH | FEATHER OAK

CHARACTER | BRUSHED & MATTE URETHANE

Also
available in
matching
plank

32-OGW-001 | 3 1/2 x 15 3/4in | 13.95ft²/pack

Calm white grains peek through the soft grey of this floor, creating a wonderfully clean and contemporary look. Smoking further enhances the subtle color variations flowing across the boards, which are brushed to bring out the wood's natural texture. Matte urethane adds a modern, muted finish.

Also available as a Harlech plank – see page 38.

STRIKING DESIGNS

The Goodrich Signature range includes striking chevron designs as well as wonderful textures and finishes that really stand out from the crowd.

The timeless elegance of natural wood and the traditional artistry of parquet flooring are combined to create our chevron designs - blocks which are angled and meet at points for a distinctive look that sets these floors apart.

Signature

WOODPECKER *Signature*

GOODRICH | SALTED OAK

CHARACTER | BRUSHED & MATTE URETHANE

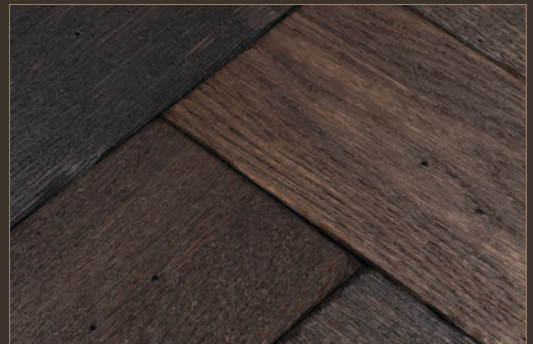

32-SGR-001 | 3 1/2 x 15 3/4in | 13.95ft²/pack

Parquet flooring gets a texture rush in this stylish and characterful floor. These signature blocks bear distinctive saw marks for a striking rustic effect, whilst being wonderfully contemporary in color.

A subtle matte urethane completes the look.

GOODRICH | CHARRED OAK

CHARACTER | BRUSHED & MATTE URETHANE

32-GCD-001 | 3 1/2 x 15 3/4in | 13.95ft²/pack

Gloriously bold and blackened, Charred Oak captures the riveting feel of a reclaimed parquet floor. Explore stunning color variations throughout unique blocks that are distressed by hand. Marks, scuffs, dents and tumbled edges tell the tale of an age-old lumber that's wonderfully worn over time.

EXTRA SPECIAL EFFECTS

Incredible textures and extraordinary finishes characterise these exquisite parquet floors. From sawing to tumbling, smoking to distressing, there are no lengths to which our craftsmen will not go to create your perfect floor.

GOODRICH | CHARRED OAK

GOODRICH | BARN OAK

CHARACTER | BRUSHED & MATTE URETHANE

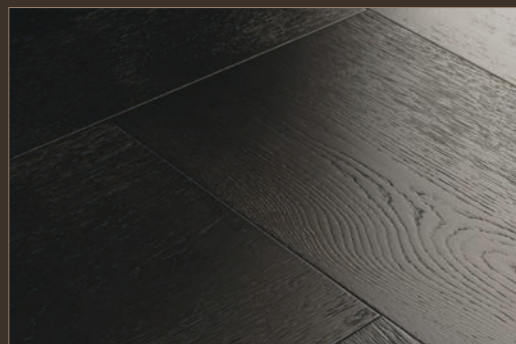

32-GBO-001 | 3 1/2 x 15 3/4in | 13.95ft²/pack

Painstakingly distressed by hand, each piece of Barn Oak is truly unique. Discover an array of antique features in this design, which tell the tale of an age-old parquet floor reclaimed to be loved once more. Tumbled edges, rich natural details and worn surface character come together beautifully with a grey washed shade for a modern rustic look.

GOODRICH | MILTON OAK

CHARACTER | BRUSHED & MATTE URETHANE

32-MIL-001 | 11 x 22in | 16.88ft²/pack

Wonderful dark and distinct, Milton is a showstopper. With extra wide blocks, this parquet floor creates a stylish statement with a twist. Beautiful grain patterns run throughout each plank and a brushed and matte urethane finish adds protection as well as a subtle sheen.

Premium, Distinguished and Beautiful

CHEPSTOW | VANILLA OAK

CHARACTER | OILED

65-PVA-001 | 7 1/2 x 74 1/4in | 22.71ft²/pack

Creamy-grey hues flow across these coastal inspired boards enlivening and brightening your room. Rustic wood character emerges from beneath the gently whitened surface which is oiled for a muted matte look and enduring protection.

CHEPSTOW | PLANED GREY OAK

CHARACTER | OILED

65-POG-001 | 7 1/2 x 74 1/4in | 22.71ft²/pack

This ash oak floor pairs the ageless flair of slow-grown European lumber with a contemporary stain. Each board is carefully sanded to achieve its beautifully smooth surface and bring to life its ashen undertones and modern grey highlights. An oiled finish completes the floor with a chic satin sheen.

AUTHENTICALLY CRAFTED

WOODPECKER *Signature*

Our Signature range is composed of extraordinary boards which have been lavished with extra care, character and technique. The discerning choice, these floors are distinctive and special.

BERKELEY | WHITE OAK

EXTRA CHARACTER | OILED

38-BVVO-005 | 7 1/2 x 73 1/4in | 22.71ft²/pack

This white oak floor evokes a beach-house feel with its chalky ashen stain and array of rustic details. Full of character, these boards give the sensation of having been part of the fabric of your home for many years. Smoking intensifies the subtle tones and an oiled finish sits within the surface layers to enhance the oak's grain structure and provide long-lasting protection.

BERKELEY | GREY OAK

EXTRA CHARACTER | OILED

38-BAG-001 | 7 1/2 x 73 1/4in | 22.71ft²/pack

Relaxing ashen hues blend with a meticulously handscraped texture in this extra character oak floor. Boards feature large knots, splits and cracks characteristic of oak that's been underfoot for decades. Every intriguing and subtle tone has been accentuated by the smoking process, then finished with oil for a muted matte look.

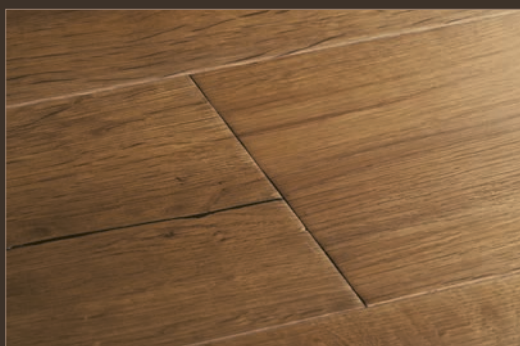

A SOPHISTICATED LOOK

Berkeley Signature floors include exquisite hand-crafted finishes. We also have a premium pine and walnut option for a distinguished and sophisticated look.

BERKELEY | WHITE OAK
PROJECT | SPACE LAB DESIGN
PHOTO CREDIT | JULIE MANNELL

BERKELEY | SMOKED OAK

EXTRA CHARACTER | OILED

38-BOS-003 | 7 1/2 x 73 1/4in | 22.71ft²/pack

Being carefully antiqued in seven individual stages has instilled stunning period accents in these planks. Strong color variations intensified by smoking, dark details and intricate wood knots evokes the character of an experienced lumber while an oiled finish enhances every grain in this exquisitely distressed floor.

BERKELEY | CENTURY PINE

EXTRA CHARACTER | OILED

38-BMC-001 | 7 1/2 x 73 1/4in | 22.71ft²/pack

The name tells its story, laid down at the turn of the last century, these hardworking boards have absorbed the footfall of generations, before being sanded down and given a fresh new lease of life. With aged blackened bevels and natural details as well as aged nail holes, this floor tells a story of years gone by. Refreshed and protected by a natural oil finish.

Please note, Berkeley Century Pine is not suitable for underfloor heating.

WOODPECKER

Signature

BERKELEY | COTTAGE OAK

EXTRA CHARACTER | OILED

38-BDW-001 | 7 1/2 x 73 1/4in | 22.71ft²/pack

Antique flooring is even more beautifully timeworn in this truly rustic design. Featuring chatter marks from the sawmill along the edges, each board bursts with the charming effects of a floor that's been laid fresh from the saw and smoothed by the tread of generations. The classic smoking treatment creates a depth of color and a subtle oiled finish gives wonderful texture.

BERKELEY | CALICO OAK

EXTRA CHARACTER | OILED

38-BCC-001 | 7 1/2 x 73 1/4in | 22.71ft²/pack

Dusky and daring, Calico Oak is a wood floor with drama. Boards are aged and distressed with realistic marks, dents and scuffed edges capturing the feel of a wood with history. The wonderful grey and taupe tones in this unique design are brought to life by the smoking process and 5 coats of premium oil, which penetrate, protect and provide the wood with a subtle matte finish.

SMOKING FOR INTENSITY

Most of our Berkeley floors are specially treated using an age-old process called “smoking” which allows our experts to subtly enhance or intensify their beautiful tones by awakening the natural tannins in the wood. Offering more complexity than a simple stained board, these smoked colors add a new dimension to your floor.

Signature

BERKELEY | COTTAGE OAK
DESIGNER | WEEDMAN DESIGN PARTNERS
PHOTOGRAPHER | RAFAEL SOLDI

LAYER UPON LAYER

All Berkeley oak floors are treated with 5 layers of natural oil, cured and hardened with ultraviolet lamps for a resilient yet beautifully subtle finish. Berkeley Classic Walnut is cured with a beautiful urethane to give it a soft silky sheen.

panels are all carefully
handcrafted to order.

SANDRINGHAM | ROYAL OAK

INTRODUCING OUR LUXURIOUS NEW RANGE OF DESIGN PANELS.

Painstakingly hand-crafted to order, these panels represent the finest in wooden flooring. Each one is created by inlaying selected blocks to create patterns both traditional and contemporary, intricate and minimalist. This technique means the natural grain runs in multiple directions, allowing light and texture to add depth and interest to the floor.

Tracing their origins as far back as the opulent palaces of 17th Century France, this classic design statement adds elegance and style to both contemporary and traditional design schemes.

Woodpecker is proud to offer you a comprehensive range of exquisite panels – 4 patterns, 3 finishes and a choice of bevels.

Featuring bevels only at the panel perimeters, this intricate pattern is nonetheless sleek and elegant, creating an impact with the interplay of different grain direction.

SUSTAINABLE AND DURABLE

BAMBOO FLOORING

For an eco-friendly floor that's naturally sleek and hardwearing

Bamboo is one of the most sustainable materials on earth. Actually a fast-growing grass, cutting encourages regrowth and it fully replenishes in only 5 years.

Bamboo forms its own unique grain patterns and can be formed into extremely hardwearing boards with the natural look and qualities of hardwood.

To produce these exceptionally hard boards, our Woodpecker experts use a process called strand weaving, binding bamboo fibres together and compressing them to create boards with a higher tensile strength than steel.

The mark of
responsible forestry

All of our wood floors
are responsibly sourced
with FSC® certification.

PEACE OF MIND FOR
GENERATIONS TO COME

THE RESPONSIBLE CHOICE

With the option of natural or coffee, plank or parquet, and finished with 5 coats of UV cured scratch resistant urethane, our bamboo floors are the sustainable solution for your beautiful home.

STRATEX® FLOORING

For high stability and
outstanding performance

Incredibly strong and stable, water resistant and with built in underlay – there's no better board for modern life.

Engineered from layers of the highest performance materials, with a mineral composite core and built in underlay, choose Woodpecker Stratex® technology for even the most challenging rooms in the house.

More durable and solid underfoot than laminate. Stable, resilient and dent resistant, Stratex® floors are the ultimate solution for the modern home.

Offering both waterproof embossed vinyl and highly moisture resistant real wood options, there's no better floor to withstand the rigors of daily life.

Our Stratex® floors come
with a 25 Year Warranty.

A PERFECT FIT

With glueless Easiloc joints and a built-in-underlay, Stratex® flooring is easy to fit and can be installed directly onto most existing subfloors.

A high-performance floor
in a wide range of realistic
wood-effect finishes

BRECON

Waterproof, Stable Mineral Composite Core & Built-in Underlay

MADE FOR LIVING

Our Brecon Stratex® flooring range offers incredibly strong and stable boards with an extremely durable, embossed woodgrain-effect vinyl upper layer and built-in underlay. Brecon doesn't need expansion when it's installed in normal living conditions, where temperatures remain between 59°F and 77°F. Offering a wide range of highly realistic wood finishes, Brecon is a stylish and practical solution for even the most demanding rooms in the house.

TACTILE TEXTURES

Subtle embossing of natural grain patterns and flows brings Brecon boards to life and adds realism and vitality to your floor.

DESIGN IDEAS

DESIGN STRIPS

For an elegant and seamless transition from one floor to another, or to add a design statement into a parquet design.

CODE	LENGTH
11-FBB-180 - Brass	3/8in x 1/8in x 71in
11-FBS-180 - Brushed Stainless Steel	3/8in x 1/8in x 71in

NATURALLY
INSPIRED WALLS

Any of the floors in our Harlech, Berkeley or Chepstow collections can be clad onto the wall using our handy clips, without the need for glue or any tricky tools.

CODE	PACK SIZE
01-SPR-001 - Wall Clips	30 Clips

STAIRPRO

Fitting wood flooring on stairs is even easier with our Stairpro product.

Available for Harlech, Berkeley and Chepstow floors, this nifty solution is a neater alternative to stair nosing, and gives a modern, clean finish.

Stairpro can be glued directly to concrete or plywood using our MS Parquet adhesive. Each set comes with a tread and riser pre-mitred with a unique locking system for quick and simple site assembly. Cut to fit the stair width and add extra flooring pieces to make up the stair height and depth for a perfectly transformed staircase.

LENGTH

Customize to the length of your chosen floor

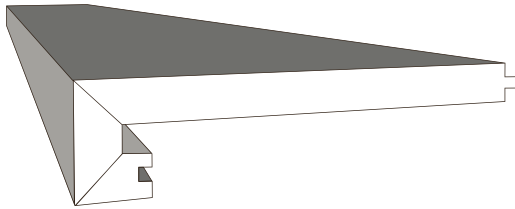

HOW TO ORDER:

Quote the name of floor and length required.

SQUARE NOSE STAIRS

A custom staircase is easy with our Square Edge Stair Nosing. Each step and riser can be made from our flooring to eliminate color matching, ensuring your stairs blend seamlessly with your floor.

Square Edge Stair Nosing can be glued to concrete or wood using our MS Parquet or WP50 adhesive. Custom made by the linear foot.

ACCESSORIES

FAITHFUL TOOLS & FINISHING TOUCHES

Our experts have developed a huge range of supporting accessories to ensure the fit of your floor is nothing less than perfect.

FOR A SMOOTH AND NATURAL TRANSITION

TRIMS

TRIM STYLE OPTIONS

SALCOMBE, HARLECH,
GOODRICH, BERKELEY
AND DESIGN PANELS

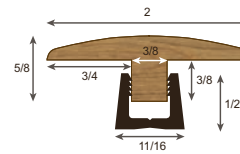

YORK, CHEPSTOW

TWIN TRIM

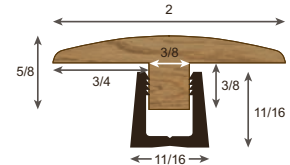

Also called a 'T-bar' or 'expansion', the twin profile is used to cover the expansion gap between two floors of equal height, providing a neat finish at a doorway, or serving as a room divider.

1/2-11/16IN

11/16-7/8IN

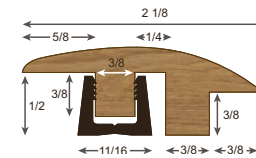

SEMI RAMP TRIM

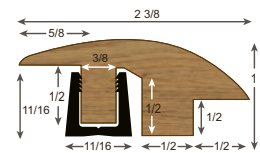

Where two surfaces meet but the difference in height is slight, a semi-ramp profile is the solution. They are ideal where your wood floor transitions to carpet.

1/2-11/16IN

11/16-7/8IN

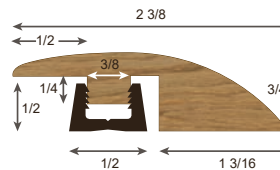

RAMP TRIM

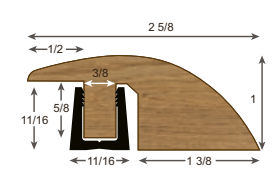

Where one surface meets another at uneven heights, a ramp profile is used. Typically, they bridge the gap between vinyl and wood flooring. They are also called 'reducers' or 'adapters'.

1/2-11/16IN

11/16-7/8IN

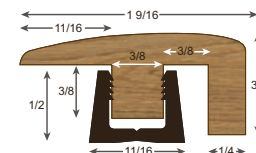

END TRIM

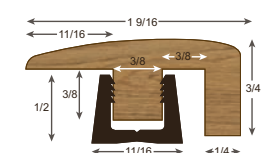

Use this profile for transitioning between wood flooring and deep pile carpet or recessed matting. It can also be used where wood flooring meets a patio door. Can also be referred to as 'edge', 'square edge' or 'end stop' profiles.

OVERLAP STAIR NOSING TRIM

Protect the edges of the flooring on your staircase with a stair nosing trim. This trim will stop excessive wear and tear and looks smart. It comes in colors to complement our flooring.

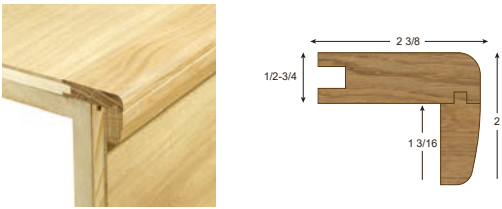

LENGTH

86 1/2in

TONGUE & GROOVE STAIR NOSING

Available in colors to complement our wood flooring, this tongue and groove stair nosing trim will provide a neat finish on your staircase. Please note tongue & groove stair nosing isn't suitable for Salcombe or Goodrich floors.

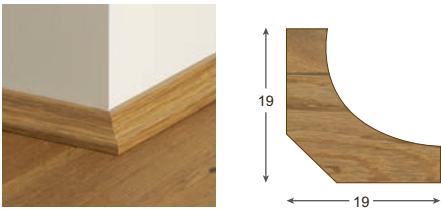

LENGTH

86 1/2in

SCOTIA TRIM

It's not always possible to remove and refit skirting boards when you fit a wood floor, so this inwardly curved trim can be used to hide the expansion gap between skirting and the flooring.

LENGTH

86 1/2in

COLOR MATCHING

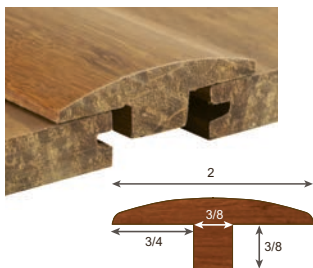

In addition to our natural oak floors, all our stained wood floors have a trim color to complement, allowing an elegant transition between different floor surfaces.

We have very careful selection processes in place to ensure that all our wood trims fully complement our flooring range. However, do be aware that like the flooring, trims are subject to natural color variation and may not appear to match the flooring exactly.

SKIRTING BOARDS AND PIPE COVERS TO SUIT YOUR FLOORING

FINISHING TOUCHES

SKIRTING BOARDS

Create a smooth transition from floor to wall, and hide expansion gaps, with attractive Woodpecker skirting boards.

SOLID OAK

Made from character grade lumber, and available either urethane or unfinished, our solid oak skirting looks fantastic. This skirting is double sided and interchangeable so gives you the option of having Torus (beading along the top) or Ogee (with a groove and a head).

Finished size: 3/4 x 5 3/4 x 86 1/2in.

CODE

69-SKU-145 - Unfinished
69-SKO-145 - Urethane

OAK VENEER

With a modern pencil round profile, Woodpecker real oak veneered skirting will give the room a classy finish and has a rear rebate to hide wiring. Skirting clips are available for a glueless installation.

Finished size: 5/8 x 3 3/4 x 86 1/2in.

CODE

11-VOS-095 - Skirting
11-SKC-050 - Skirting Clips (Pack of 50)

COLORSEALANT MASTIC

10.5 fl oz gunnable cartridge for wood and Stratex® floors, used to perfect the finishing touches.

CODE COLOR

06-WCS-001 Color Sealant Oak
06-WCS-002 Color Sealant Pine
06-WCS-003 Color Sealant Walnut
06-WCS-004 Color Sealant Light Grey

PIPE COVERS

Conceal that unsightly hole around the radiator pipe with an easy-to-fit cover, color-matched to your natural wood flooring.

SOLID

Our hardwood pipe covers come in two halves with a unique jigsaw design so that they clip together creating a seamless join with an inside diameter of 5/8in. These are available to complement all floors in our catalogue.

COLOR PER PACK

Oak or Unfinished 2
Stained or Walnut 2

HEAT VENTS

These are available in custom sizes and colors to match your Woodpecker floor.

COLOR MATCHING

We have very careful selection processes in place to ensure that all our wood trims fully complement our floorboard range. However, do be aware that like the flooring, profiles are subject to natural color variation and may not appear to match the flooring exactly.

CUSHION & PROTECT YOUR FLOOR

UNDERLAY & BARRIERS

FLOORMATE

Floormate provides excellent moisture protection, and is ideal for areas of heavy foot traffic. Made from recycled rubber, this is a great environmentally friendly option which is also suitable for use over underfloor heating. Floormate incorporates a foil vapour barrier and combines comfort, support and good sound and thermal insulation.

Eco-friendly -
Made from
recycled
rubber

CODE	DEPTH	PER ROLL
49-FME-010	3.5mm	110ft ²
49-FME-015	3.5mm	180ft ²

BASIC 20

Where you have a level and moisture-free subfloor, Basic 20 underlay is the optimum choice. It's inexpensive, offers good comfort and support, and has reasonable soundproofing and thermal qualities too. It's particularly useful for upper floors where moisture isn't an issue. Tog rating: 0.72.

CODE	DEPTH	PER ROLL
49-GB0-015	1/8in	180ft ²

AQUASTOP DAMP PROOF MEMBRANE

Designed especially for ground level subfloors where moisture could be present, Aquastop has the same qualities as Basic 20 underlay, plus a laminated damp proof membrane (DPM), which is 3 3/16in wider than the underlay padding to ensure ultimate moisture protection when installed. Popular, inexpensive and with a tog rating of 0.67.

CODE	DEPTH	PER ROLL
49-GBP-015	1/8in	180ft ²

SOLITEC

This specialist underlay has a strong adhesive top layer for the floor to bond to, making it ideal for floating solid wood or engineered boards. You don't need tape, glue or nails. It must be used in conjunction with a damp proof membrane to protect against moisture migration. We only recommend installing over underfloor heating with engineered wood flooring.

CODE	DEPTH	PER ROLL
49-ST5-003	1/8in	110ft ²

ACOUSTAMAT

If you are concerned about noise pollution, install an Acoustamat slatted underlay in conjunction with WP50 Sausages to form a liquid batten system. The perforations are ideal for applying the adhesive and once installed it provides a reliable acoustic barrier. It's also great for uneven subfloors.

Use with
WP50 Adhesive
Sausages.

See page 138

CODE	DEPTH	PER ROLL
49-SSK-001	1/8in	180ft ²

MOISTOP BARRIER PAPER

This moisture resistant barrier paper is perfect if you're using secret nails to secure a wooden floor over a lumber-based subfloor. Its bitumen backing self-seals around the nail holes to maintain a watertight barrier and prevent your flooring absorbing moisture from below.

CODE	PER ROLL
53-MBP-001	270ft ²

DAMP PROOF MEMBRANE (DPM)

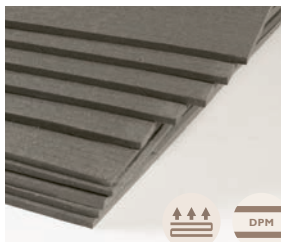

Designed to be used in conjunction with a cushioning underlay, and to prevent moisture damaging your floor, this membrane is durable and strong with high puncture resistance. It's made from 1000-gauge high quality polythene.

CODE	DEPTH	PER ROLL
37-DPM-100 (3/16" x 82')	1000 gauge	1076ft ²

XL UNDERLAY

If your subfloor suffers from some minor dips (up to 1/8in) XL Underlay can help solve the problem. It's made from lightweight extruded polystyrene and comes in packs of 10 tiles that are 19 11/16in wide by 47 1/2in long. It offers exceptional sound and thermal insulation, and when taped together forms an effective moisture barrier. Tog rating: 1.7.

CODE	DEPTH	PER ROLL
49-WXL-001	3/16in	65ft ²

VAPOUR TAPE

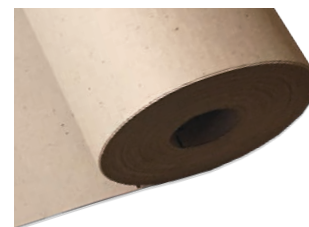

Use this self-adhesive foil tape when laying a Woodpecker moisture barrier, or products like our XL Underlay tiles. It not only blocks out moisture but is an easy way to strengthen joins.

CODE	SIZE
10-VPT-097	2 61/64in x 82ft

PROTECTALAY

Save clean-up time, control dust, dirt and debris during renovations with our temporary floor protection. The material provides a strong, moisture-resistant yet breathable shield which can be used to safeguard wood flooring during and after installation.

CODE	SIZE
49-PRL-001	39 3/8 x 1,181in = 323ft2/roll

FOR THE BEST SUBFLOOR PREPARATION

ADHESIVES & SEALANTS

MS PARQUET ADHESIVE

Made specifically for use with Woodpecker floors, MS Parquet is recognized for its quality. In just 30 minutes, it will secure wood boards.

CAREFULLY DESIGNED PRODUCTS

All of our subfloor and adhesive products have been carefully designed not only to work wonderfully with wood flooring, but to work seamlessly together too. When used as a system to prepare and install, each product supports the next, creating a strong and reliable base for Woodpecker flooring. Here are some common subfloor scenarios where our adhesives and sealants can be used together:

OLD SOLID SCREEDED FLOOR THAT REQUIRES LEVELING:

OLD AND DUSTY SOLID SCREEDED FLOOR THAT DOESN'T REQUIRE LEVELING:

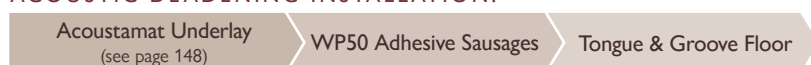

OLD AND UNEVEN WOOD FLOORBOARDS:

STICKING DOWN TO AN ANHYDRITE SCREED WITH UNDERFLOOR HEATING:

ACOUSTIC DEADENING INSTALLATION:

USEFUL CLEANING
AND MAINTENANCE TIPS

HARLECH | SMOKED OAK

**1 DOOR MATS**

A good quality floor mat will catch dirt and grit, preventing damage further into your home. Grit underfoot is like sandpaper, scratching the floor's finish, so consider fitting Woodpecker Coir Matting which provides a barrier to wet and dirty feet.

**2 RUGS OR CARPET RUNNERS**

We know that the last thing you want to do is cover up the beautiful texture of your natural wood floor, but sometimes prevention is better than the cure. Consider rugs or carpet runners for high footfall areas such as doorways, halls and stairs.

**3 BE CAREFUL WITH FURNITURE**

Never drag furniture or other objects across your wood floor – it can easily result in unsightly dents or scratches. Woodpecker offers a variety of felt protectors and castor cups that enable you to move furniture easily without marking your floor.

**4 SHOE RULES**

Avoid wearing heavy shoes or work boots when stepping onto your natural wood floor. High heels, and stilettos in particular, should be avoided. They exert a huge amount of pressure that easily dents or marks even the toughest of wood floors.

**5 CLEAN UP SPILLS**

Liquid is the enemy, so mop up any spilled drinks and never allow water or other liquids to sit for any length of time. The odd drop may not hurt, but excessive amounts of water will cause lasting damage.

**6 PET PATROL**

Nothing's more natural than a dog or cat curled up by the fire, asleep on your wood floor. But remember to keep your pet's claws trimmed to prevent scratches and, as with point five, if there are any 'accidents' make sure they're cleaned up fast.

**7 SUNSHINE**

Sunlight will naturally help the wood's color to mellow, so move rugs, mats and furniture regularly to ensure an even maturing of color. Excessive exposure to direct sunlight can lead to expansion/shrinkage, warping and splitting. Consider shading your floor from large windows that face the sun.

**8 LIGHT CLEANING**

Regular sweeping with a soft bristled broom will get rid of dust and rogue bits of grit on the floor. You can also vacuum a natural wood floor – ideally with a soft brush attachment to minimise scratching.

**9 MOPPING**

Always use a well-wrung mop when cleaning and remove excess liquid immediately. Woodpecker supplies specially formulated Cleaning Kits that include a gentle Spray Mop, Cleaning Liquid and Care Guide for both urethane and oiled finishes.

MAINTAINING A BEAUTIFUL FLOOR LONG TERM CARE

Even though the most advanced wood treatments and finishes are used to create our floors, they will need to be looked after to stay in tip-top condition. This involves cleaning and sometimes re-finishing your flooring at suitable intervals to ensure it continues to delight throughout its lifetime.

CLEANING OILED FLOORS

For a deeper clean now and again, use Woodpecker One Coat Soap. This clever product will clean your floor and form a protective film, helping to build its surface resistance over time and making your floor even easier to maintain.

RESTORATION TREATMENTS FOR WOOD FLOORING

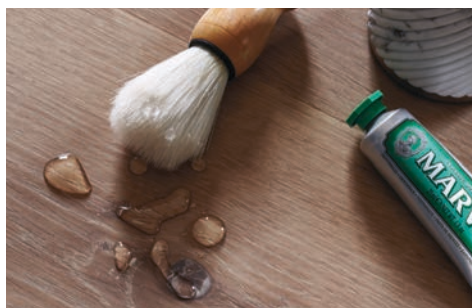

How often you recoat or repair your floor will depend on several factors including the type of floor it is, its finish and the wear it's experienced. As a basic preventative measure, you might consider recoating your floor every two or three years. Don't wait until your floor looks worn. If you allow the protective coat to wear away, it becomes susceptible to dirt and water penetration and harder to clean and repair.

A QUICK TEST

A good way to check whether your floor needs treatment is to pour a few drops of water onto its surface. If the finish is in good order, the water will bead on the floor and can easily be wiped away. No maintenance is needed. If the water slowly soaks into the lumber, leaving behind a light saturation mark, the finish is starting to wear thin. A new coat of urethane or oil should be applied. However, if the water is immediately absorbed and leaves a dark stain, the finish has been completely worn away and the floor may need sanding and recoating.

NB: Before any treatment is carried out, we recommend testing in an inconspicuous area of the floor to check compatibility.

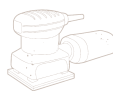

BRECON FLOOR REPAIRS

The best way to conceal small scratches and marks on our Brecon range is with Scratchfix – a quick and easy method to restore scratches on resilient floors.

RE-URETHANE & REPAIRS

If your urethane floor gets any isolated scratches or dents, these can be sealed using Woodpecker Scratch Cover according to the instructions supplied.

Deeper scratches or gouges might call for professional wood filler, available in a variety of colors from most hardware and flooring retailers. Afterwards, apply some Woodpecker Scratch Cover to give the repair a protective finish.

Extra care is needed when sanding stained floors to ensure that the process doesn't break through the complete layer of stain. In this instance, the floor would require a patch-repair before the urethane is applied.

If the floor is badly worn in some places, it may be necessary to sand the flooring back to its unfinished surface before recoating all over. Unlike oil, urethane doesn't penetrate the wood's surface, instead it sticks to it so the entire floor must be covered to avoid ridges and overlap marks. A single coat of urethane will be enough to protect against moisture, though several coats should be applied if the floor faces lots of foot traffic.

RE-OILING & REPAIRS

Unlike urethane floors, isolated areas of an oiled floor can be treated without having to re-oil the entire floor. Oiled surfaces aren't as tough as urethane surfaces and need to be maintained more often, by applying Woodpecker One Coat Oil.

CLEANING & CARE PRODUCTS

PROTECTION

COIR MATTING

Coir matting is a great way of protecting your natural wood floor.

CODE	WIDTH
42-COI-010	39in

CASTOR CUPS

Protect your floor from the dents, pressure marks and scratches that could be caused by heavy furniture.

CODE	DESCRIPTION	SIZE
05-FCC-363	Castor Cups x 4 Light Wood Grain	1 3/4in
05-FCC-364	Castor Cups x 4 Light Wood Grain	2 3/8in

FELT PADS

Place underneath all types of furniture including dining chairs and table legs to protect from scratches.

CODE	DESCRIPTION	SIZE
05-FFP-951	Heavy Duty Felt Pads x20 (Round)	3/4in
05-FFP-952	Heavy Duty Felt Pads x16 (Round)	1in
05-FFP-953	Heavy Duty Felt Pads x8 (Round)	1 1/2in
05-FFP-947	Heavy Duty Felt Pads (Various Sizes)	Multipack
05-FFP-950	Heavy Duty Felt Pads x2 (Rectangular)	4 1/2 x 6in

EXPERT KNOWLEDGE

Over time, felt pads collect grit and so to prevent any unnecessary scratches on your floor, remember to renew your felt pads every so often.

range

EXPERT KNOWLEDGE

TECHNICAL

A Woodpecker floor is beautiful when installed with consideration and care. The next few pages will help you with some useful tips.

If you need any further help, our Expert Team are happy to talk through any queries with you. Get in touch on 206 929-5029 or sales@woodpeckerflooring.com

INSTALLATION

PREPARATION

BEFORE DELIVERY

Ensure concreting, plastering and decorating are complete, the building is thoroughly dried out and windows and doors are fitted and watertight.

PREPARING THE SUBFLOOR

The subfloor must be in good structural condition, free from damp rot, fungal or insect infestation and contaminating residues. It must be flat, with bumps and dips not exceeding 1/8in over a 11/16in area, vacuumed and free of debris. Hot pipes should be well insulated to prevent localised hotspots, which can cause warping or shrinkage.

LEVELING THE FLOOR

If the subfloor needs to be levelled, apply our Level-X™ Primer followed by Level-X™ Self-Leveling Compound, which is fibre reinforced. Never use latex self-leveling compounds.

DAMP PROOFING

Moisture readings shouldn't exceed 70% RH for cement-based concrete (shouldn't exceed 65% RH when there's underfloor heating) and 11% WME for wooden subfloors or joists. If in doubt, always use a Woodpecker moisture barrier.

NB: The subfloor should be prepared for installation in accordance with the industry standards outlined in BS-8201-201

HEATING AND AIR CONDITIONING

Room temperature and humidity levels need to be stable before flooring is delivered. Heating/air conditioning should be on for at least two weeks before the floor is laid. Underfloor heating must be thoroughly tested, and turned off 48 hours before fitting.

ATMOSPHERIC CONDITIONS

Room temperature shouldn't be lower than 18°C (64°F), or floor temperature lower than 15°C (59°F). The Atmospheric Relative Humidity should be between 40 and 60%.

ACCLIMATISATION

The sealed, unopened boxes should be laid flat, in the centre of the room for 24 hours (Stratex®), 3-4 days (engineered/bamboo) or 5-7 days (solid), in typical living conditions. DO NOT store it outdoors, in an outbuilding, or anywhere with damp/condensation problems.

INSPECTION

Check each plank before installation. If there are any problems, get in touch with us so that we can rectify them. We can't consider any defects after the floor has been installed.

VISIT OUR WEBSITE FOR
FULL PREPARATION AND
INSTALLATION DETAILS:
[woodpeckerflooring.com/
installation-instructions](http://woodpeckerflooring.com/installation-instructions)

LAYING THE FLOOR

We recommend that our flooring is installed by an experienced installer. If the flooring is laid over an existing boarded floor, it should be positioned at right angles to the previous planks. Otherwise we recommend laying planks in the same direction as the light entering the room, mixing lighter and darker shades. Fit according to installation instructions.

Disclaimer: Installation guidance is advisory and is based on established good practice and the BS-8201-2011 standard. It is the installer's responsibility to follow these procedures before, during and after installation. Woodpecker cannot accept responsibility for any issues relating to installation.

EXPERT TIP

SUBFLOOR

A rule of thumb for the drying time of a sand and cement-based screed is one day per millimetre for the first 2in, and 2.5 days for each millimetre thereafter. So, a 2in screed should take about two months to dry out, and a 4in screed will take six months. Plaster takes up to six weeks to dry completely.

ATMOSPHERIC CONDITIONS

The room temperature shouldn't be lower than 18°C (64°F), or the floor temperature lower than 15°C (59°F). The Atmospheric Relative Humidity should be between 40 and 60%. Note that wood floors are not suitable for wet rooms, or in areas where there is a regular flow of water.

MOISTURE TESTING

Moisture is the enemy of natural wood, and can damage your beautiful flooring. Even when your subfloor looks dry, it may contain excess moisture in the substrate. Using a professional moisture meter such as the Protimeter MMS will tell you whether or not it's safe to go ahead with installation. Readings shouldn't exceed:

- 70% Relative Humidity (RH)
for cement-based concrete
- 11% Wood Moisture Equivalent (WME)
for wooden subfloors or joists

INSTALLATION

FIXING

FULLY GLUED DOWN

Tongue and groove planks can be fixed directly to a concrete subfloor using Woodpecker MS Parquet Adhesive. Never glue the tongue and grooves together if you choose to fully stick down a wood floor as the boards could crack.

FLOATING

Floating a floor means the boards are laid loose over the subfloor if they're a clic system, and when floating a tongue & groove, the joints must be glued. A floating floor can be installed on concrete, anhydrite, existing wood floor, ceramic tiles, PVC and linoleum – but not carpet.

LOC SYSTEM

If possible, it's easiest to 'loc' the boards in complete rows rather than individually. When connecting the header joints, insert the board into the lip at an angle of 30° and at the same time move the board closer and lower into position. It should 'loc' into place. If it won't go, don't force it. Check the board for dirt, excess urethane or any other obstruction, remove that, and try again.

FLOATING TONGUE AND GROOVE

When laying a floating floor, you should glue tongue and groove boards together for stability, and to stop squeaking. Run adhesive along the groove of the long side and header joint of a plank. Slide it towards the long edge of the facing tongue with the header joint connected, then tighten with a tapping block or pulling iron.

NAILING

A tongue and groove wood floor can be secret nailed to an existing lumber subfloor or, as long as the flooring is 3/4in or thicker, fixed directly to joists as a structural floor.

The subfloor must be of a suitable width and thickness to hold 2in cleats fired into it at a 45° angle. Joists should be kiln dried to avoid cupping or expansion and must be spaced in accordance with building regulations. When secret nailing to the subfloor or joists, always use Woodpecker Moistop Barrier Paper, for additional moisture protection. Flooring should be fitted at 45° or 90° to the subfloor and nailed over every joist.

Never use adhesive to glue between boards if it's being nailed down. The glue will inhibit the natural flexibility of the flooring and could cause cracks.

EXPERT TIPS

DON'T OVERGLUE

Never glue the tongue and grooves together if you choose to fully stick down a wood floor. Too much pressure will be placed on the boards and they could crack.

IT'S NAILS OR GLUE, NOT BOTH

Never use adhesive to glue between boards if it's being nailed down. The glue will inhibit the natural flexibility of the flooring and could cause cracks.

Tongue and groove planks can be fixed directly to a concrete subfloor using Woodpecker MS Parquet Adhesive.

Floating a floor just means the boards are laid loose over the subfloor if they're a clic system, when floating a tongue & groove, the joints must be glued.

Tongue and groove planks can be secret nailed to a suitable existing lumber subfloor.

INSTALLATION

QUICK
FITTING TIPS

To allow for expansion gaps, spacers should be used at regular intervals when fitting and then removed before skirting boards, beading or trims are put in place.

EXPANSION GAPS

As wood is a natural substance, it will expand and contract with changes in the temperature and humidity. Therefore, expansion gaps need to be left to allow the floor to move.

To determine how much space needs to be left:

- Expansion gaps for wooden and bamboo flooring should be 3/8-5/8in regardless for floors measuring up to 8m in width. Thereafter, an extra 2mm per metre should be added for every extra meter.
- Stratex floors need 1/16-1/8in expansion where there is likely to be moderate temperature variation beyond normal living conditions (temperatures between 59°F and 77°F). Extremes of heat may require even more expansion, and shielding from direct sunlight may be needed.
- Skirting boards and perimeter trims should be fixed to the wall and shouldn't obstruct the movement of the floor in any way.
- Please see pages 140-145 for our full range of trims that can be used to conceal your expansion gaps.

CALL OUR TEAM OF EXPERTS

If you need any further help, our Expert Team are happy to chat through any queries you have. You can reach us on 206 929-5029 or email us at sales@woodpeckerflooring.com

UNDERFLOOR
HEATING

BEFORE INSTALLATION

- Turn off the underfloor heating for at least 48 hours prior to fitting the floor.
- Use expansion trims to allow for differential movement between heating zones, or unheated areas.

EXPERT TIPS

TEMPERATURE CONTROL

Ensure the system is calibrated so that the temperature to the underside of the wood floor never reaches more than 81°F, even if the thermostat setting is increased.

AFTERCARE

- Once fitted, the floor should be left to acclimatise for 2-3 days before the underfloor heating is turned on.
- When the heating is switched on it should be set at 33°F above the ambient temperature of the room and then raised by a further 33°F per day until the desired temperature is reached. Do not turn it on full straight away, this can cause the wood to shrink, expand or even crack.
- Gradual temperature changes should be continued, with 33°F changes per day to accommodate the changing seasons. Leave the heating permanently on at a slightly lower temperature setting when it is not required.

EXPERT TIPS

SLOW AND STEADY

When the heating is switched on it should be set at 33°F above the ambient temperature and then raised by a further 33°F per day until the desired temperature is reached. Do not turn it on full straight away. Raising and lowering the temperature too quickly can cause the wood to shrink, expand or even crack.

WOODPECKER FLOORING - TERMS & CONDITIONS OF SALE

In the unlikely event that goods are delivered wrong or damaged, it is the responsibility of the customer to ensure sufficient time is allowed for a replacement to be sent.

1. DEFINITIONS

In these terms and conditions, the following words shall have the following meanings:

"Buyer" is any person, firm or company to whom the Company supplies Goods or with whom the Company enters into negotiations for the supply of Goods.
"Company" is Woodpecker USA, Inc., a Delaware corporation.
"Goods" means products, articles or things which are supplied by or which are the subject of negotiations for supply by the Company to the Buyer.

2. ORDERS

All orders are placed under these terms and conditions alone. The Company's salesmen are not authorized representatives and are not authorized to accept confirm or vary any order nor to make any representation or promise on the Company's behalf. No variation of these terms and conditions is permitted unless expressly accepted by a Director of the Company in writing. Any quotation is open for a period of 30 days only from the date thereof, provided that the Company has not previously withdrawn it. These terms and conditions exclude any other terms and conditions inconsistent therewith which a Buyer might seek to impose even though such other terms and conditions may be submitted in a later document and/or purport to exclude or supersede any terms or conditions with them or may be contained in any offer or acceptance or counter-offer made by the Buyer. All floors supplied by the Company must be fitted in accordance with NWFA Standards and Guidelines.

3. CANCELLATION

No cancellation by the Buyer is permitted except where expressly agreed by a Director of the Company in writing. In the event of agreed cancellation by the Buyer, the Buyer will indemnify the Company fully against all expenses incurred up to the time of such cancellation together with by way of a liquidated damage restocking fee of ten percent (10%) of the contract price for the materials which shall be paid by the Buyer to the Company, or deducted from the Buyer's deposit, upon receipt of Buyer's cancellation notice.

4. TERMS OF PAYMENT / DEPOSIT

Buyer shall pay 50% of the contract purchase price at the time of order; with the balance due on or before delivery to the job site. The Company reserves the right to charge interest at one percent (1%) per month on all amounts more than twenty (20) days past due.

5. DELIVERY

The Company shall not be liable for any loss, consequential or otherwise, caused by late delivery or by the failure to make Goods ready for collection on the due date. Buyer shall inspect the goods upon receipt for conformity with Buyer's order. Deviations in quantity between the Goods delivered and Goods ordered representing less than ten percent (10%) by value shall not give the Buyer the right to reject the Goods or to claim damages and the Buyer shall be obliged to accept and pay at the contract rate for the quantity of the Goods delivered.

6. RISK OF LOSS AND THE PASSING OF TITLE IN GOODS

Risk of loss shall pass to the Buyer when the Goods are delivered to the job site. Notwithstanding risk in the Goods passing in accordance herewith, title in the Goods shall not pass to the Buyer until the first of the following to occur: (a) Payment being received by the Company for the Goods and no other amounts then being outstanding from the Buyer to the Company in respect of other Goods supplied by the Company; (b) The Buyer selling the Goods in accordance with the provisions of these terms and conditions in which case title to the Goods shall be deemed to have passed to the Buyer immediately prior to delivery of the Goods to the Buyer's customers; or (c) the Company waiving its rights under this clause with respect of specified Goods whereupon title to the said Goods shall forthwith vest in the Buyer.

The Buyer is licensed by the Company to use or to agree to sell the Goods delivered to the Buyer subject to the express condition that the entire proceeds of any sale are held in trust for the Company and are not mixed with other moneys or paid into an overdraft bank account and shall at all times be identifiable as the Company's moneys. Until title to the Goods passes: (w) the Buyer will hold the Goods as fiduciary agent and Bailee for the Company; (x) the Goods shall be kept separate and distinct from all other property of the Buyer and of third parties and in good and substantial repair and condition and be stored in such a way as to be clearly identifiable as belonging to the Company; (y) the Company may at any time revoke the power of sale to the Buyer if the Buyer is in default beyond the 20th of the month following invoice in the payment of any sum whatsoever due to the Company (whether in respect of the Goods or any other Goods or Services supplied at any time by it to the Buyer) if the Company has bona fide doubts as to the solvency of the Buyer; or (z) upon determination of the Buyer's power of sale, the Buyer shall place any of the Goods in its possession or under its control and unsold

at the disposal of the Company and the Company shall be entitled to enter upon any premises of the Buyer for removing such Goods. The Company shall at all times be entitled to appropriate any payments made by the Buyer in respect of any Goods in settlement of such invoices or accounts in respect of such Goods as the Company may in its absolute discretion think fit notwithstanding any purported appropriation to the contrary by the Buyer.

7. LIEN / UCC FINANCING STATEMENT

The Company shall retain its lien rights in the Goods until final payment is tendered and may secure its interest by filing a UCC financing statement in the county where the customer resides and where the Goods are delivered for installation.

8. INSPECTION/SHORTAGES

For technical reasons it is not always possible to obtain an exact color match between different production batches which have the same color description. The Company therefore recommends that all products should be of the same batch. The Company will be under no liability whatsoever in respect of any mismatching of tiles and sheet with the same color description where the tiles and sheet are of different batches.

The Buyer is under a duty to inspect the Goods forthwith on delivery. The Company shall be under no liability for any defects or shortages that would be apparent on careful inspection if the terms of this clause are not complied with, and, in any event will be under no liability if a written complaint is not delivered to the Company within seven (7) days of delivery or supply detailing the alleged defect or shortage. In all cases where defects or shortages in respect of Goods are complained of the Company shall be under no liability in respect thereof unless an opportunity to inspect the Goods is given to the Company before any use is made thereof or any alteration or modification is made thereby by the Buyer. The Company shall make good any defect or shortage in the Goods and where appropriate replace any Goods damaged in transit as soon as it is reasonably able to do so, but otherwise shall be under no liability whatsoever or howsoever arising from such defect, shortage or damage.

9. LIMITED WARRANTY

Our warranty has been designed to provide you with complete reassurance about your wood flooring purchase. Our warranty covers: The durability of the floor's structure; and the quality of finish, including dimensions, joints, and appearance of the floor's top layer.

How to make a warranty claim:

If you have found a defect or problem with your floor, please initially contact the retailer or contractor from whom you purchased the floor and ask them to send a letter of explanation and a proof of purchase to us at Woodpecker USA, 1436 S. Director St., Seattle, WA 98108 (206) 929-5029. Your claim will be received and assessed by one of the team at Woodpecker USA. A Woodpecker USA agent may ask to view the floor on site in order to confirm your claim. The floor must have been purchased from an authorized Woodpecker dealer and entirely paid for. The purchase of Woodpecker USA hardwood flooring from an unauthorized dealer or via the Internet will automatically void any warranty.

PLEASE KEEP YOUR SALES RECEIPT. INFORMATION REGARDING THE CLAIMED DEFECT AND DATE AND PROOF OF PURCHASE MUST BE PROVIDED.

The Limited Warranty: If your claim is accepted, Woodpecker USA warrants that it will do the following:

In the case of a significant defect or problem with the floor's structure or quality of the finish, including dimensions, joints, and appearance of the floor's top layer, Woodpecker USA will recoat, refinish, fill or furnish comparable flooring (of Woodpecker USA's manufacture and of similar color, pattern, and quality), for either the repair of the defective area or the replacement of the floor, at Woodpecker's option. In the unlikely event that Woodpecker USA is unable to correct the problem after a reasonable number of attempts, Woodpecker USA will refund the portion of the purchase price for the section of failed flooring. If your floor was professionally installed, Woodpecker USA will also pay reasonable labor costs for the direct repairs or replacement within the first five years of the warranty period, or the length of the warranty period, whichever is less based on the following schedule.

First two years of warranty period: labor reimbursed at 100% of reasonable and customary charges. Three to five years of warranty period: labor reimbursed at 50% of reasonable and customary charges.

This limited warranty does not include the removal or replacement of cabinets, fixtures, retail markings, installation or labor provided by others or supplemental costs, including but not limited to, relocation during the repair process such as hotel, meals, or moving and storage of furniture.

The warranty is given only to the original purchaser of our product. The warranty is not transferable. The warranty is only valid in the state or province in which the flooring was purchased. The warranty is valid for 25 years from the date of purchase. The warranty does not cover conditions arising from the following:

Improper storage, handling or installation of flooring. Squeaking and/or cracking by any cause other than the mis-manufacture of the flooring.

Man-made or natural disasters including, but not limited to, leaking or broken plumbing, fire, flood, earthquake or standing water during or after construction.

Any problems to the wood relating to sub floor moisture emissions or adhesive bond issues.

Any damage to the wood flooring related to excessively humid or excessively dry environmental conditions.

Improper preparation of, or deficiencies in, the sub/floor/floor joint assembly including, but not limited to, subfloor material, fasteners, patching or leveling compounds. These situations are considered to be part of the installation inspection process prior to installing the flooring. Do not install flooring if these situations exist.

Insect infestation after shipment from the factory. Insect infestation after shipment from the factory. Neglect or abuse including, but not limited to, not taking proper precautions to protect furniture legs and feet with felt protectors, dirty or improper casters, moving heavy objects without a dolly and/or protective plywood beneath.

Damage from spiked and/or damaged heels or pet claws.

Dents or scratches in the flooring caused by furniture, appliances, casters, foot traffic or other unusual conditions.

Falling objects which can dent or fracture the flooring and finish. Moisture infiltration from sidewalls or from any surface other than through the subfloor.

Construction traffic abuse to the surface of the flooring.

Non-factory applied finish (by the owner or installer) including, but not limited to, refinishing, recoting or cleaning and maintenance products.

Normal color variations and natural characteristics of real wood products discovered AFTER the flooring is installed.

The normal wearing of the finish in high traffic areas, pivot points, and seating areas. Gloss reduction is not considered wear through, and therefore is not covered under the finish warranty.

Any damage to the flooring surface due to application of adhesive tapes for any reason.

Damage caused by fire, flooding, and other natural disasters and Acts of God.

A product deformity that is not measurable or that is visible only under certain light or from a certain angle is not considered a defect and is therefore not covered by these warranties. Visible defects should be evaluated by their visibility from a standing position in normal lighting.

Natural wood characteristics such as variations in grain, color, mineral streaks, knots, normal differences between color of samples and the color of installed floors, and color variations from board to board.

Natural expansion and contraction resulting in separation between boards or damage caused by low or excessive humidity. Floors that are installed in other than owner-occupied or tenant-occupied residences.

The wearing of stiletto heels on the flooring.

Commercial installations of residential products.

Construction or installation-related damage.

Floors damaged by subfloor moisture or water damage, including without limitation, damage arising from broken or leaking water pipes, flooding, wet-mopping spills or weather conditions.

Installation defects, including installations made: (i) in violation of applicable state or local housing or building codes; or (ii) contrary to written instructions furnished with the product.

NOTE: YOU AND YOUR INSTALLER ARE RESPONSIBLE FOR INSPECTING FLOORING PRIOR TO INSTALLATION. WOODPECKER USA ACCEPTS NO RESPONSIBILITY FOR LIABILITIES, CLAIMS OR EXPENSES, INCLUDING LABOR COSTS, WHERE FLOORING WITH VISIBLE DEFECTS HAS BEEN INSTALLED.

The foregoing sets forth Woodpecker USA's sole obligations and liability under the warranty. The warranty is an exclusive remedy and is in lieu of all other express and/or statutory warranties.

Woodpecker USA disclaims all warranties not expressly set forth above. None of Woodpecker USA's installers, retailers, distributors or employees has the authority to alter the obligations, limitations, disclaimers or exclusions under any of Woodpecker's warranties.

WOODPECKER USA EXCLUDES AND WILL NOT BE LIABLE FOR OR PAY INCIDENTAL, CONSEQUENTIAL OR SPECIAL DAMAGES UNDER ITS LIMITED WARRANTY.

This includes any loss, expense or damage other than to the flooring itself that may result from a defect in the flooring. This limited warranty constitutes the only express warranty for the product purchased.

TO THE EXTENT PERMITTED BY LAW AND FOR ALL NON-CONSUMER PRODUCT, ALL WARRANTIES OTHER

THAN WOODPECKER USA'S LIMITED WARRANTY, EXPRESS OR IMPLIED, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, ARE DISCLAIMED. IF ANY IMPLIED WARRANTY ARISES UNDER STATE LAW, ANY AND ALL IMPLIED WARRANTIES (INCLUDING ANY WARRANTY OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE) ARE LIMITED IN DURATION TO THE DURATION OF THIS WRITTEN WARRANTY, TO THE EXTENT ALLOWED BY LAW. SOME JURISDICTIONS MAY NOT ALLOW EXCLUSION OR LIMITATIONS OF INCIDENTAL OR CONSEQUENTIAL DAMAGES OR LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS, SO THE ABOVE LIMITATIONS OR EXCLUSIONS MAY NOT APPLY TO YOU. THESE WARRANTIES GIVE YOU SPECIFIC LEGAL RIGHTS, AND YOU MAY ALSO HAVE OTHER RIGHTS WHICH VARY FROM JURISDICTION TO JURISDICTION.

10. FORCE MAJEURE

The Company shall not be liable for any failure to deliver the Goods arising from circumstances outside the Company's control such as act of God, war, riot, explosion, abnormal weather conditions, fire, flood, strikes, lockouts, Government action or regulations (UK or otherwise), delay by suppliers, accidents and shortage of materials, labor or manufacturing facilities. Should the Company be prevented from delivering the Goods or performing the Services in the above circumstances, it shall give the Buyer written notice of this fact as soon as reasonably practicable after discovering it. If the circumstances preventing delivery of the Goods or performing the Services are still continuing three months after the Buyer receives the Company's notice, then either party may give written notice to the other cancelling the contract. If the contract is cancelled in this way, the Company will refund any payment which the Buyer has already made on account of the price (subject to deduction of any amount the Company is entitled to claim from the Buyer) but the Company will not be liable to compensate the Buyer for any further loss or damage caused by the failure to deliver the Goods or perform the Services.

11. SALES PROMOTION DOCUMENTATION

The Company takes every precaution in the preparation of its catalogue, technical circulars, price lists and its other literature; however, these documents are for the Buyer's general guidance only and the details contained therein shall not constitute representations by the Company and the Company shall not be bound thereby.

12. NOTICES

Any notice to be given hereunder shall be in writing and shall be deemed to have been delivered (i) if sent via email upon receipt and confirmation; (ii) upon personal delivery to the Company or customer, as the case may be; (iii) three (3) days after delivery in the US Mail, Certified, return receipt requested, postage prepaid; or (iv) the day following the day that the notice is delivered to an overnight delivery service marked priority next day mail delivery.

13. ADVICE AND WARNINGS

Without prejudice to any of the Company's rights under these terms or common law or statute the Company shall not be liable for any loss or damage suffered by the Buyer or any third party because of failure to follow any of the Company's recommendations about the goods.

14. SUITABILITY OF GOODS

If requested in writing to do so, we will use our reasonable best efforts to give sound advice as to the suitability of goods sold by us for a particular use or purpose, but we do not represent or warrant (and nobody has authority to represent or warrant on our behalf) the fitness of any goods for any particular purpose or use, whether such use or purpose is known to us or not or any advice requested regarding installation.

15. ASSIGNMENT

The Buyer shall not assign or purport to assign or transfer the contract or the benefits thereof to any creditor or other person without prior written consent of the Company which may be withheld in the Company's sole, unconditional discretion.

16. JURISDICTION AND VENUE

The Contract shall be governed by and construed in accordance with Washington State law, notwithstanding any conflicts in law with the state in which a claim may arise. Any claim against the Company arising under this Agreement must be made in King County, Seattle, Washington.

Revision Date: September 2021
